Ultra Revolution™
Concealed Gate Operator

Ultra
Revolution™
Gate Operators

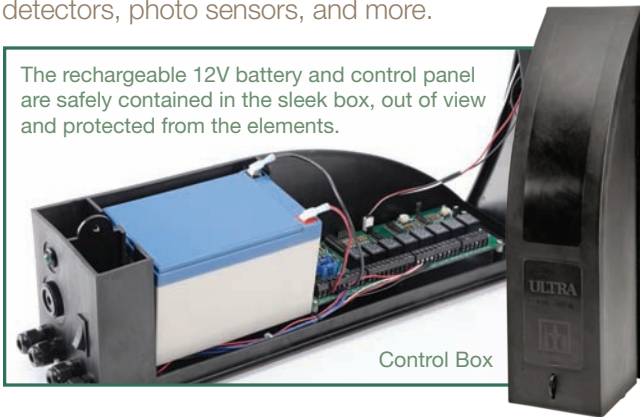

This changes everything you know
about Powered Estate Gates

Ultra Revolution™ gate opener eliminates the need
for unsightly motors, brackets, and armatures
that can ruin the aesthetics of your Estate Gate.

Ultra Revolution™ Gate Operators

The Revolution automatic gate system runs off of a rechargeable 12V battery, which is trickle charged via transformer connected to 110 volts or optional 10-watt solar panel. With its solar power capabilities and 12V battery power source, the Revolution Gate is environmentally friendly, and can work even in the event of a power outage. All the power components and remote sensors are hidden away in a compact, weather-resistant control box. All our gate opening systems are UL-325 Compliant. Many safety features are compatible with our electronics, including loop detectors, photo sensors, and more.

The rechargeable 12V battery and control panel are safely contained in the sleek box, out of view and protected from the elements.

Ultra Revolution Features & Benefits

No Unsightly Motors

Actuator is concealed within gate upright.

No Unsightly Control Box

Electronics are housed in a sleek box approx. 4" wide.

Factory Installed / Tested

Fast, problem-free installations.

Simple Design

Installs like a standard gate.
No need for Access Control experts.

12 Volt System

Energy efficient and solar power compatible.
Environmentally friendly.

Full System Compatible

Full line of options & accessories available.

Efficient Design

Reliable. Reduces costly maintenance and repair.

Flexibility

Can be installed where other openers cannot.

Economical

Reduces costly labor.

UL-325 Compliant

Exceeds industry safety standards.

Ultra Revolution™ Gates offer state-of-the-art efficiency for optimum performance.

Ultra Revolution automatic gate openers are factory-tested and come fully assembled for faster, trouble-free installations. Unlike other typical gate openers whose mechanisms can cause damaging lateral stress on the gate, the Revolution™ actuation mechanism is contained entirely within the mounting post, so long-term operation of the gate has little to no effect on its performance or structural integrity. The sleek and efficient design reduces the need for costly system service, maintenance and repair of the gate itself.

Ultra Revolution can be adapted for use with wood, vinyl or chain link fence.

Optional Custom Designer Inlays are available — consult your Ultra representative.

We've hidden all the workings in our revolutionary post

We've put everything into the post—motor, actuators and all the connections. This concealed operating system utilizes an integrated mounting post and power actuator that delivers simple rotational motion of the mounting post itself. The force required to open or close the gate is minimal and constant throughout the range of motion. The Revolution Post attaches to the Fence through a unique one-piece extrusion and a special set of hinges top and bottom.

The Revolution Gate system can achieve full 90 degree openings, and is fully adjustable. It can be utilized in single and dual swing gate applications.

NO MORE UNSIGHTLY MOTORS

All components are color-matched to your gate.

All colors are applied with a special Powercoat™ finish to resist harsh weather and heat. Custom colors are available with a modest upcharge.

Colors shown are present as appropriate comparisons and may vary slightly from actual product color.

Ultra Lifetime Warranty

Ultra Aluminum fence and railing products are guaranteed for life against defects in workmanship and/or materials. The Powercoat™ finish on all fencing and railing by Ultra Aluminum is guaranteed for life against cracking, peeling or chipping. Visit our website for more information and a copy of the warranty.

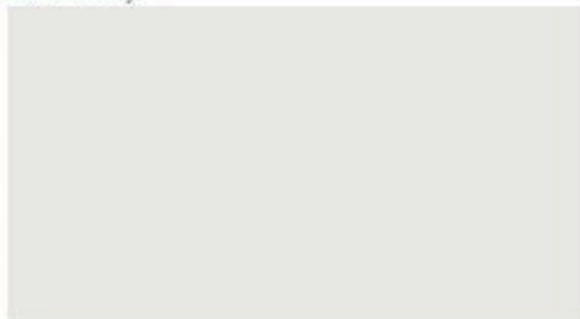

Environmentally Responsible

Ultra is proud to use recycled aluminum in our products. Aluminum is the most commonly recycled metal in the world. Our Powercoat™ coating process is environmentally friendly and virtually pollution-free.

Ultra Revolution™ can make your walk-through gates completely hands-free.
