The love affair with ornamental fencing began hundreds of years before Ultra was started. Metal fence was beautiful, majestic, and made from a material that was destined to rust and crumble—iron. As good as the coatings technologies evolved through the ages, nothing could protect that fragile metal from deteriorating.

Along comes Ultra Aluminum and their concept for architecturally appealing fence that would withstand the tortures of weather, pollution, chemicals and savage environments. Ultra started with humble beginnings in 1996 and a desire to replicate the intricate details of historic ornamental iron fences, only using materials that would end up being stronger, and stand up to the variations of weather and climate with long-lasting durability. At Ultra, we push everything to the edge, and choose our materials and components in support of that quest.

Where's the motor? Where's the ugly armature?

We've hidden all the workings in one revolutionary post.

Ultra Revolution™ Gates offer state-of-the-art efficiency for optimum performance. This concealed operating system utilizes an integrated mounting post and power actuator that delivers simple rotational motion of the mounting post itself.

The force required to open or close the gate is minimal and constant throughout the range of motion. The Revolution Post attaches to the Fence through a unique one-piece extrusion and a special set of hinges top and bottom.

What are the benefits of Ultra Aluminum ornamental fencing?

Ultra Aluminum ornamental fences add elegance, sophistication and style to any setting. They're available in a range of colors—Black, Satin Black, Bronze, Satin Bronze, Beige, Satin Khaki, White, Satin White and Forest Green. Standard finishes are smooth and shiny, and our Satin finish imparts a matte texture. And Ultra can customize a paint finish to match your home's design, siding, accessories or landscaping. Customization is a big asset when purchasing an aluminum ornamental fence. You can add mid-rails, circles, scrolls, and finials. Circles, butterflies and scrolls are installed between rails, while finials dress up the tops of pickets. Pickets above the top rail can be straight, staggered, concave or convex. With slight modification, they can also provide trusted security. You can add stronger, larger and taller pickets, and reinforced rails. Traditional gate latches and locks can be specified, for added protection. 

UAF 200 with Ball Post Caps.

The clean lines of the UAS 100 fence go well with the architecture of this modern home.

How do Ultra Aluminum fence and railing products compare to similar steel or wrought iron products? The biggest advantage to an Ultra Aluminum product is its maintenance-free characteristics. Unlike steel or wrought iron, an Ultra product won't rust and its Powercoat™ paint finish is guaranteed for life. And strength is never compromised with an Ultra product. Its high-strength Ultrum™ Alloy is as strong as steel and has been tested to withstand hurricane wind gusts up to 259 mph.

From Left to Right: The Circles on this Bronze UAF 200 add a decorative touch, and the shade complements the home's color scheme; Tri-Finials and Decorative Circles on this UAS 100 Estate Gate welcome you to this impressive manor; Spear top UAS 100 ornamental fence encloses these charming Antebellum homes.

UAB 200 fence and arched gate is the perfect enclosure for a beautiful swimming pool.

Ultra designs fencing to meet all pool safety codes
"Flush" is when the bottom rail encloses the bottom of the pickets, so no pickets are exposed. "Modified" is when the bottom rail has been moved down to meet code, leaving the bottom of the pickets exposed.

Aluminum Swimming Pool Fences

Ultra designs aluminum fencing and railing to meet all the stringent BOCA swimming pool safety codes. Several Ultra Residential picket fence styles and the Eclipse™ Privacy style are specifically designed to comply with BOCA code. The most important compliance factors for ornamental aluminum fence are:

- Fence must be at least 48" (4 ft) tall.
- The mid-rail must be at least 45" above the bottom rail.
- The spacing between pickets must be less than 4".
- The space between the bottom rail and the ground must be less than 4".
- Gates must be self-closing, self-latching, and open outward (away from the pool area).
- The opening mechanism of the latch must be at least 54" above ground.

Ultra assumes no liability for improper installation. Code compliance is the sole responsibility of contractor.

Eclipse™ fencing in White is the ideal pool fence for security, protection and privacy.

Ball Caps and distinctive Pressed Spears add elegance to this UAF 250 pool fence.

Handsome UAB 400 with Ultra Picket ensures a safe pool environment.

How to tell if you're getting a genuine Ultra® Fence, Rail or Gate
It's in the details. The inner strength of the aluminum alloys we use.
The quiet strength of the extra ribs inside Ultrarails™. The depth and dependability of our Powercoat™ finish. We push everything to the edge.

From Top to Bottom: Neither rain nor sleet nor snow will harm the appealing Satin Khaki finish on this UAS 101 fence; Ultra's Powercoat™ finish protects the Beige color of this UAS 350 from the hot sun; Strong winds and punishing weather won't diminish the strength and beauty of this UAF 200 fence; This UAB 200 fence endures sun, moisture, and chemicals, and still looks fabulous.

Changing weather extremes are no match for Ultra Fencing

Homeowners want a fence they can rely on, not only for protection, but for good looks year after year. Ultra Fence has been tested to withstand wind gusts of up to 259 mph. And the Powercoat™ finish on every Ultra fence maintains higher levels of UV protection, so the gorgeous color won't dull or fade due to sun, rain, snow or other environmental factors.

Colors

Ultra Fence, Railing and Gates are available in nine classic colors as well as custom specified hues. All colors are applied with a special Powercoat™ finish to resist harsh weather and heat.

Colors shown represent an approximate comparison and may vary slightly from actual product color.

UAS 100

Uniquely You... decorative accents that show off your personal style

Decorative Circles are positioned and then locked between the top two horizontal rails and the vertical pickets of a three-rail fence. Fence sections come factory-assembled with circles, which alters the spacing of the top two horizontal rails, and therefore must be specified when ordering. Circles are individually cast, which provides for a cleaner paint finish. Butterfly Scrolls can be positioned on the vertical pickets between the top two horizontal rails of a three-rail fence. Fence sections come factory-assembled with Butterfly Scrolls, and can be added to previously built sections. Large Scrolls are suitable as gate accents or on taller fence panels. Scrolls are notched to fit a specific size of picket. Large Scrolls are sold separately and can be added to any fence style. Scrolls must be specified at the time of purchase. Size: 16" long by 7" wide (nominal). Decorative Finials can be used in place of pressed spears, for an elegant touch. Ultra offers a Quad-Finial and a Tri-Finial design, both of which come factory installed. Decorative Ball Caps may be used in place of a standard cap on fence posts. Solar Light Caps automatically charge during the day and shine at night. For use with 2" and 2 1/2" square posts; in Black only.

Left: The ornate flourishes on this Victorian house are enhanced by the Quad-Finials, Butterflies and Scrolls of this UAS 100
