Ultra Aluminum™ Fencing & Railing @Work

Commercial and industrial fencing from Ultra Aluminum™ is ideal for perimeter control, to surround and protect government buildings, airports, power plants or generators, institutions, and the like. Property must be safeguarded, expensive equipment must be protected from vandalism, and security must not be compromised. Ultra Commercial and Industrial Fencing™ performs its job exceptionally, dependably, and with minimal maintenance:

that's Ultra Aluminum™ Fencing & Railing @Work. 

Top: UAD 100 Defender capably protects this airport; **Center:** This UAD 100 Defender industrial fence combined with a cantilever gate provides a strong deterrent and offers visual appeal.

Hard-working and good-looking

Ultra Aluminum™ Industrial fencing's sturdy 1-5/8" reinforced rails and 1" pickets combine for durable and heavy-duty protection. The Commercial series of fences has 1-1/4" x 1-3/8" reinforced rails and 3/4" pickets, and Eclipse™ privacy screening features 3/4" x 5" tongue and groove boards. The sleek picket profiles and privacy boards are not only handsome, but make the fence difficult to climb, deterring trespassers. Our Ultrum™ Alloy will never rust and our exclusive Powercoat™ AAMA 2604-5 finish ensures long-lasting beauty and is environmentally friendly. And, our wide selection of fence styles and decorative accents offer attractive design options that result in great curb appeal.

Top: An Eclipse™ Privacy fence obscures the air conditioning units at this commercial facility. **Center:** A sturdy and impressive UAF 200 guards this manufacturing company. **Bottom:** Formidable yet handsome, our industrial UAF 200 performs its duties with poise and assurance.

the best kind of defense

Industrial fencing from Ultra Aluminum™ provides a barrier whose intimidating looks alone will discourage attempts to penetrate it; and the strength and durability to keep would-be trespassers and vandals at bay.

All our styles are made with our high-strength Ultrum™ Alloy, a 6005-T5 alloy with a minimum ultimate strength of 35,000 psi, and guaranteed for life against defects in workmanship and/or materials. The exclusive Powercoat™ finish on all fencing and railing by Ultra Aluminum™ is guaranteed for life against cracking, peeling or chipping.

Tall and imposing UAS 100 with snub pickets provides a barrier at this athletic facility.

UAF 200

All work and no play...

Our industrial fencing features a substantial profile for heavy-duty security, along with the elegant look of wrought iron that enhances any facility, institution or property it protects.

Top: UAF 200 commercial fence features the traditional look of wrought-iron to complement the classic architecture of the church in the background. **Bottom:** UAS 100 with spear top pickets safeguards the football stadium within.

Looking for the strong, silent type?

Ultrack™ Cantilever and V-track gates offer state-of-the-art efficiency for optimum protection.

Every fence needs a gate, and industrial and commercial fencing is no exception. Ultra's line of Cantilever and V-Track Gate systems are engineered for strength, security and architectural appeal.

These tough gates are designed with sliding mechanisms that can be easily opened and closed with one hand, and adaptable for use with automatic gate openers and security systems.

Examples of facilities that benefit from having an Ultra fence paired with an Ultrack™ Cantilever or V-Track Gate: factories, manufacturing facilities, chemical plants, government offices, military installations, financial institutions, athletic or entertainment venues, and travel hubs such as airports, train and bus stations.

From Top to Bottom: UAF 200 Estate Gate with slide opener protects the homeowners' property and possessions; the same gate from the inside, shown with Ultra's new Deimos rack and pinion slide gate opener and mounting bracket; UAS 100 Cantilevered Estate Gate looks stately and elegant.

Cantilever Gates

Our industrial cantilever gates are engineered for both security and architectural appeal for openings from 6' to 50' wide. As tough as these gates are, the sliding mechanisms are designed so even our largest gate can be easily opened and closed with one hand. But, they are easily adapted for use with our line of automatic gate openers and existing security systems.

All these industrial cantilever gates are made of Industrial grade components produced in the U.S.A. in Ultra's manufacturing facility, and come with a 5-year limited warranty. Cantilever Gates conform to ASTM specification F-1184, and all gate hardware meets or exceeds ASTM specifications F-626 and A-153. All gates are equipped with a Safety Seal which protects the filler material.

Cantilever Gates are available for openings 6' to 50' W and 4', 5', 6', 7', and 8' H; custom sizes available. Hardware is included.
