

Colors

Signature Railing and Gates are available in nine classic colors as well as custom specified hues. All colors are applied with a special Powercoat™ finish to resist harsh weather and heat.

Colors shown represent an approximate comparison and may vary slightly from actual product color.

We're Made In The USA

Ultra is proud to only use American-made components in all its products. Ultra Fence™ is designed, produced and assembled in the U.S.A. Always look for the 'Made In the U.S.A. label' when deciding which fence products to use.

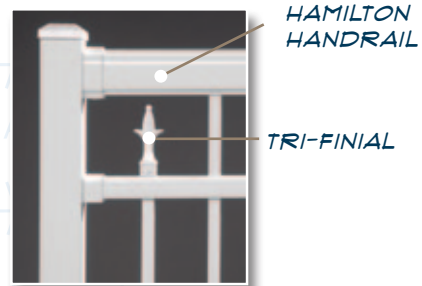

Ultra Aluminum Lifetime Warranty

Ultra Aluminum fence and railing products are guaranteed for life against defects in workmanship and/or materials. The Powercoat™ finish on all fencing and railing by Ultra Aluminum is unconditionally guaranteed for life against cracking, peeling or chipping. **Visit our website for more information and a copy of the warranty.**

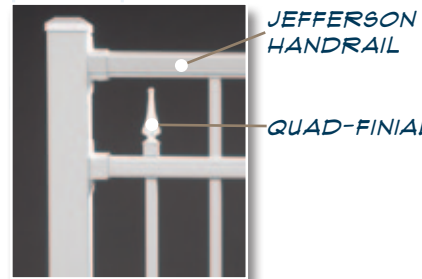

Environmentally Responsible

Ultra is proud to use recycled aluminum in our products. Aluminum is the most commonly recycled metal in the world. Our Powercoat™ coating process is environmentally friendly and virtually pollution-free.

Superior Product Design for Ultra-Strength

How to tell you're getting genuine Signature Railing.

It's in the details. The inner strength of the aluminum alloys we use. The quiet strength of the extra ribs inside our rails. The depth and dependability of our Powercoat™ finish. We push everything to the edge.

High-strength Ultrum™ Alloy, Made in the USA

It's as strong as steel, but will never rust. Ultrum is a 6005-T5 alloy, with a minimum ultimate strength of 35,000 psi.

Our Signature double-wall rail design adds strength and conceals the fasteners

Two-piece top rail has 8 ribs and hides the fasteners underneath.

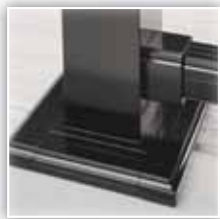

Factory assembled, with stainless-steel fasteners

For structural integrity and strength you can count on.

All gates are fastened and 100% welded at all connections and joints

Designed to stand up to the rigors of everyday use.

Signature railing incorporates Boss Posts and Boss Floor Flanges

With hidden fasteners for a clean, professional look.

Powercoat™ Finish—panels, gates, posts and designer accessories

When applied, Powercoat is twice the thickness and hardness of a typical acrylic, baked enamel, or "wet paint" finish, making it more durable, fade-resistant and scratch-resistant than other coatings.

Over-the-top Architectural Details can really make a difference

Signature rails have an innovative shape and design

Flutes on all our rails for an heirloom quality appearance

Multiple grades of pickets and balusters for every performance level
 3/4" Square Pickets, 3/4" Monticello Balusters; 1" Square Pickets and 1" Monticello Balusters

Signature is available in nine standard colors; same price, same delivery time
 Custom colors are even available with a modest up-charge

MONTICELLO BALUSTER

Even the way we pack and ship your railing is more than anyone expects, or any competitor will attempt.

Railing sections are factory assembled and placed in a corrugated shipping box, interleaved with foam padding between sections and nylon strapped together, so there's no shifting and no rubbing.

Your railing arrives fully assembled and ready to be professionally installed.

We've pushed our Signature Railing to the limits.

Signature Railing is ICC (International Commercial Code) compliant—strong enough to meet or exceed all building codes for railings. The Signature Railing system utilizes a double-wall design that withstands considerably more lateral force than code requires. The outer rail provides a secure hand grip, and completely covers all stainless-steel fasteners for a sleek, hidden-fastened look. All railing panels come in standard 6' widths when flange-mounted, and standard 8' widths when core-drilled. Shorter panels can be provided from the factory, or field trimmed to meet exact measurements on-site.

SIGNATURE Series

Signature CSP COMMERCIAL SERIES PREMIUM

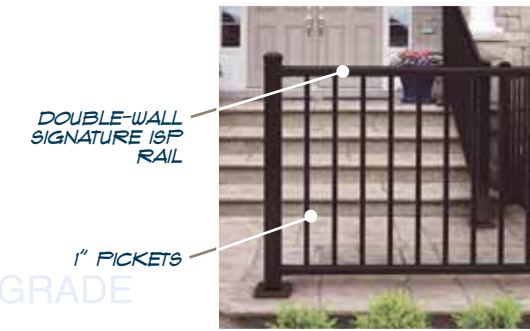

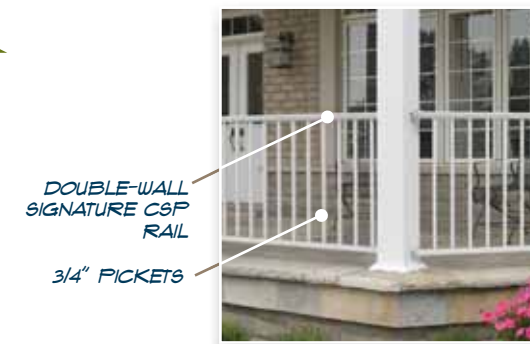

has larger scale components for heavier-duty performance.

- Additional Strength
- Hidden Fasteners
- Impervious to Insects

Signature ISP INDUSTRIAL SERIES PREMIUM

gives you industrial-strength for the ultimate in high-performance railing.

- Additional Strength
- Hidden Fasteners
- Impervious to Insects

Railing Options

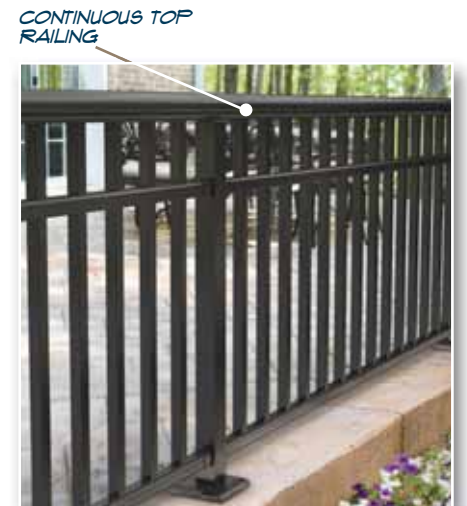

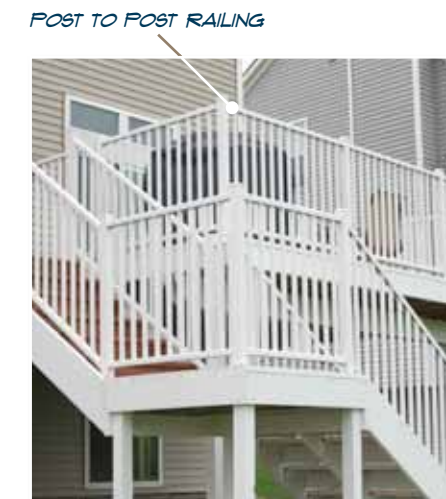

Signature Railing is available in two configurations:

Post to Post

A special rail end is used to attach the panel to the post.

Continuous Top

Creates a sleek, continuous rail from end to end, for an uninterrupted grasp.

Style Options

Signature has more handrail designs than most of our competitors, with a profile and color to fit all types of architecture.
