FINELY CRAFTED
GATES, RAILING & FENCE

“All journeys eventually end in the same place, home.”

Now Your Wrought Fencing, Railing & Gates Can Be Handsome, Historic & Built to Last

Wrought iron fencing and gates have come to portray the essence of strength, protection and elegance on beautiful homes and properties for centuries. Our minds have romanced those gorgeous designs and the images of the landscape behind them into an art form. The trouble is, the cost associated with hand-making all those fence and gate pieces, along with the relentless maintenance of a true hand-wrought iron fence has made ownership a challenge. **Until now.**

"A man travels the world over in search of what he needs and returns home to find it."

“With friends, one is well, but at home, one is better.”

Designs can be modern or historic

Ultra *Estate Collection* Fencing, Railing & Gates uses a series of Computer Numerically Controlled (CNC) machines designed by European blacksmiths to twist and turn the metal into intricate patterns and shapes. The superior quality of our material and number of design options far exceed the look and performance of the lightweight aluminum products typically found. The treatment of the metal components can replicate all the nuances and fine scroll work found in the iron fencing that was hand-hammered long ago. You may choose from an existing design, change an existing design to suit your tastes or collaborate with us on a custom, one-of-a-kind creation.

“Home gives you something no other place can...your history.”

Metals and coatings chosen for their endurance

When creating products for the *Estate Collection*, we start with high-strength alloys, known for their endurance, and powder coat them with a super-durable layer that is designed to stand up to conditions that cause ordinary steel and iron to rust and corrode.

Efficiently designed for a gate, porch railing or to fence an entire estate

Because our fencing and gate components are forged by CNC machines, your chosen design elements can be easily replicated and incorporated into a complete fencing system for your property. Even porch/deck railing, Juliet balconies, etc... can be designed to give you a cohesive look throughout your property. Our gates can also accommodate all types of automation.

Anything a blacksmith can do...

Twists, scrolls, embossing and hammered textures can all be specified. With Ultra's *Estate Collection* Gates, Railing & Fence, we have the ability to duplicate hand-wrought finials and ornate baskets built into the pickets. We can even “weave” the metal for a truly unique look. The possibilities are endless.

Design options to fit your style

There are almost no limits to the design and configuration of your gates, railing or fence. Below are just a few examples amongst the thousands of options available.

Please see our website and www.ultraestatecollection.com for complete gate, railing and fence decorative designs.
