

CLEANING GUIDELINES

Although Ultra products are designed to require a minimal amount of maintenance, keeping your fence/railing looking its best is no different than any other item around your home... an occasional cleaning goes a long way. Over time, any painted surface exposed to the elements will start to show signs of weathering such as a slight color change or a dulling of the finish. This is especially true with products exposed to harsh sun, salt, or other airborne contaminants. Ultra's Powercoat™ finish offers you some of the best protection available against these elements, but a simple, regular cleaning is necessary to maintain the appearance.

We recommend an occasional wash using warm water and a non-abrasive, pH neutral detergent applied with a soft cloth, sponge or soft bristle brush. Popular household cleaners like *Windex*®, *Fantastik*® and *Simple Green*® are examples of safe cleaners to use. The surface should be thoroughly rinsed after cleaning to remove residue. The use of a pressure washer is not suggested. Do not use solvent-based products to clean your fence/railing.

Although the frequency of cleaning depends on environment and location, in cases of installations within 1500 ft of a body of salt water, cleaning is required every 3 months. For installations beyond 1500 ft of a body of salt water, cleaning is required every 6 months. Product directly exposed to ice melting agents must be cleaned monthly.

Ultra requires these cleaning guidelines be followed and recorded below with receipts in order to process a warranty claim:
