

1.5" Secondary Handrail Systems

This system works perfectly with Ultra Signature™ and Ultra Max® Railing

Ultra Signature™ 1.5" secondary handrail is a modular system designed to meet the railing code requirements for the Americans with Disabilities Act and Uniform Federal Accessibility Standards. The advanced mechanical design allows flexible ordering of parts and kits along with on onsite assembly without any need for welding. All materials are aluminum and will not rust.

1.5" Secondary Handrail by Ultra Aluminum™

Ultra Aluminum™ has designed our secondary handrail system to blend seamlessly with all our railing designs, offering an extra level of safety, strength and accessibility for any building, deck or porch.

Made with a high-quality powder-coated finish that is AAMA-2604 compliant, our components resist fading, chipping and corrosion. Brackets include fasteners for aluminum post installations. Aluminum rings hide railing seams for a smooth transition between components, and aluminum end caps conceal open rail ends.

Colors shown represent an approximate comparison and may vary slightly from actual product color.

Gloss or Textured Finishes

Our advanced Powercoat™ finish allows us to produce a high-quality, long-lasting finish, which is also environmentally friendly. Powercoat is twice the thickness and hardness of a typical baked enamel finish, and meets AAMA 2604 standards for the ultimate in durability and UV Protection.

POWERCOAT

Environmentally Responsible

Ultra Aluminum™ is proud to use recycled aluminum in our products. Aluminum is the most commonly recycled metal in the world. Our Powercoat™ coating process is environmentally friendly and virtually pollution-free.

Ultra Lifetime Warranty

Ultra Aluminum™ railing products are guaranteed for life against defects in workmanship and/or materials. The Powercoat™ finish is guaranteed for life against cracking, peeling or chipping.

Visit our website for more information and a copy of the warranty.

Materials

All Ultra Aluminum™ railing components are extruded from Ultrum™ 6005-T5 alloy, with a minimum ultimate strength of 35,000 psi. Ultra posts come in a variety of thicknesses, and are also Powercoat™ finished.
